ABSTRACT

Data are provided about student enrollment by race/ethnicity in Utah since 1977, the first year that this enrollment information was available. The growth in enrollment in Utah's schools since 1977 has primarily resulted from internal growth, with a secondary increase because of migration. From 1977, enrollment increased at a strong 2.2% or more a year until 1987. Then, in a period of economic recession, growth dipped below 2.2% until 1990. The rate remained at 2.1% for 2 years, and has since declined to less than 1.0% per year. This decline is a demographic phenomenon as the baby boomers leave the child-bearing years. It is projected that statewide enrollment rates will increase after the year 2000. As reflected in the 1997 total enrollment percentages, most students by race/ethnic category also live in four metropolitan counties. Most of Utah's minority group students live in these counties, with the exception of American Indians, who are more likely to live in rural areas. There are only six states with less racial and ethnic diversity than Utah, where about 89% of the students are white. Other groups are experiencing strong growth in percentage terms, although there numbers are still small. Hispanics are experiencing a 7.5% growth rate, and there were over 31,000 Hispanic students enrolled in 1997. Tables contain information about the state's 40 school districts. (Contains 1 map, 6 charts, and 113 tables.) (SLD)

Overview

The intent of this report is to provide data and information that will answer the most frequently asked questions regarding student enrollment by race/ethnicity in Utah's 40 school districts. All tables are available via the Utah State Office of Education's web site at www.usoe.k12.ut.us

Utah's school districts are required by Utah Code (53A-3-403 and 53A-1-301) to submit statistical data using, ultimately, methodologies and definitions specified by the U.S. Department of Education, National Center for Education Statistics. The Fall Enrollment count is a census of each student as of October 1 each year, and has varied a little over time. This report begins with 1977, because it is the first year that Fall Enrollment report included enrollment by race/ethnicity.

Utah's Enrollment Change

Utah's enrollment growth since 1977 has been primarily the result of internal growth (births) and, secondarily, migration. From 1977, enrollment increased at a strong 2.2 percent or more a year until 1987. Then, in Utah's recessed economy, growth dipped below 2.0 percent until 1990. The rate remained at 2.1 percent for two years and has since declined to less than 1.0 percent per year. This decline in rate is primarily a demographic phenomena as the baby boomers have for the most part exited the child-bearing years. Their oldest children began to be graduated earlier this decade, and their grandchildren have begun to be born. The grandchildren will be entering kindergarten after the turn of the millennium. It is then that statewide enrollment increases are expected to return to approximately 2.4 percent annually.

Students entering school include kindergartners, in-migrants, and those returning to school from private or home schools. Students exiting school include graduating seniors, out-migrants, dropouts, and those leaving to attend private or home schools. In 1997, there were 9,453 private school students in Utah. The number of home-schooled students is unknown, but it is estimated to be less than 1.0 percent of total public school enrollment, or a few thousand. In general, a home-schooled student will travel in and out of the public school system for a variety of reasons over the course of his/her school-age life.

District Growth

Since 1977, Park City has been the state's fastest growing district. For the past ten years, it has averaged just under 10.0 percent growth per year. If it were to maintain its current rate, Park City's enrollment would double by the year 2005.

The second-fastest growing district, Washington, more than tripled its enrollment of 5,221 between 1977 and 1997. If it were to maintain its current average annual rate of growth of 4.9 percent, Washington's enrollment would double by the year 2012, or in only 15 years. The 13,187 new students composed 29.0 percent of all the growth that occurred in rural districts.

The state gained over 161,000 new students between 1977 and 1997. The districts of Jordan, Davis, and Alpine gained nearly half of this growth. In facility terms, these districts alone would have needed approximately 80 new elementary schools, 16 junior highs, and 9 new high schools to accommodate the additional students. A new elementary school currently houses about 800 students, a junior high about 1,200, and a new high school between 1,700 and 2,200.

Metropolitan Utah

As defined by the U.S. Bureau of the Census, Utah's Metropolitan Statistical Areas include Weber, Davis, Salt Lake, and Utah counties. In 1977, 76.2 percent of all Utah students lived in these four counties. By 1997, this percentage dropped slightly to 74.7 percent, as certain rural areas experienced strong relative growth rates, notably Summit and Cache counties, and the southwest counties of Washington and Iron.

Aggregates of school district-level data to the county and multicounty planning district levels have been included for convenience throughout the report.

Race/Ethnicity

The race/ethnicity categories were established by the U.S. Department of Education in 1960. (Asian and Pacific Islander were disaggregated for the first time in 1990.) Included are:

> American Indian or Alaskan Native - A person having origins in any of the original peoples of North America.
>
> Hispanic - A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish language culture or origin *regardless of race.*
>
> Asian - A person having origins in any of the original peoples of the Far East or Southeast Asia. This area includes, for example, China, Japan, Korea, Taiwan, Burma, Cambodia, Indonesia, Java, Malaysia, Laos, Thailand, Vietnam, and the Philippine Islands.
>
> Pacific Islander - A person having origins in the Pacific Island. This area includes Fiji, Guam, Hawaii, Moorea, New Zealand, Samoa, Tahiti, and Tonga.
>
> Black, not of Hispanic Origin - A person having origins in any of the Black racial groups in Africa.
>
> White, not of Hispanic Origin - A person having origins in any of the original peoples of Europe, North Africa, the Middle East, or the Indian subcontinent.

While the enrollment series is consistent over the 21 years, it does not compare to the U.S. Census Bureau's current race/ethnicity definition. Since the 1980 decennial Census, its racial categories have been: American Indian, Eskimo, or Aleut; Asian or Pacific Islander; Black; and White. Hispanic is considered to be an ethnicity, not a racial category. Therefore, according to the Census definition, a person may be of any race in addition to being Hispanic. According to the U.S. Department of Education, one must choose between Hispanic and other groups. The two sets of definitions are therefore not comparable.

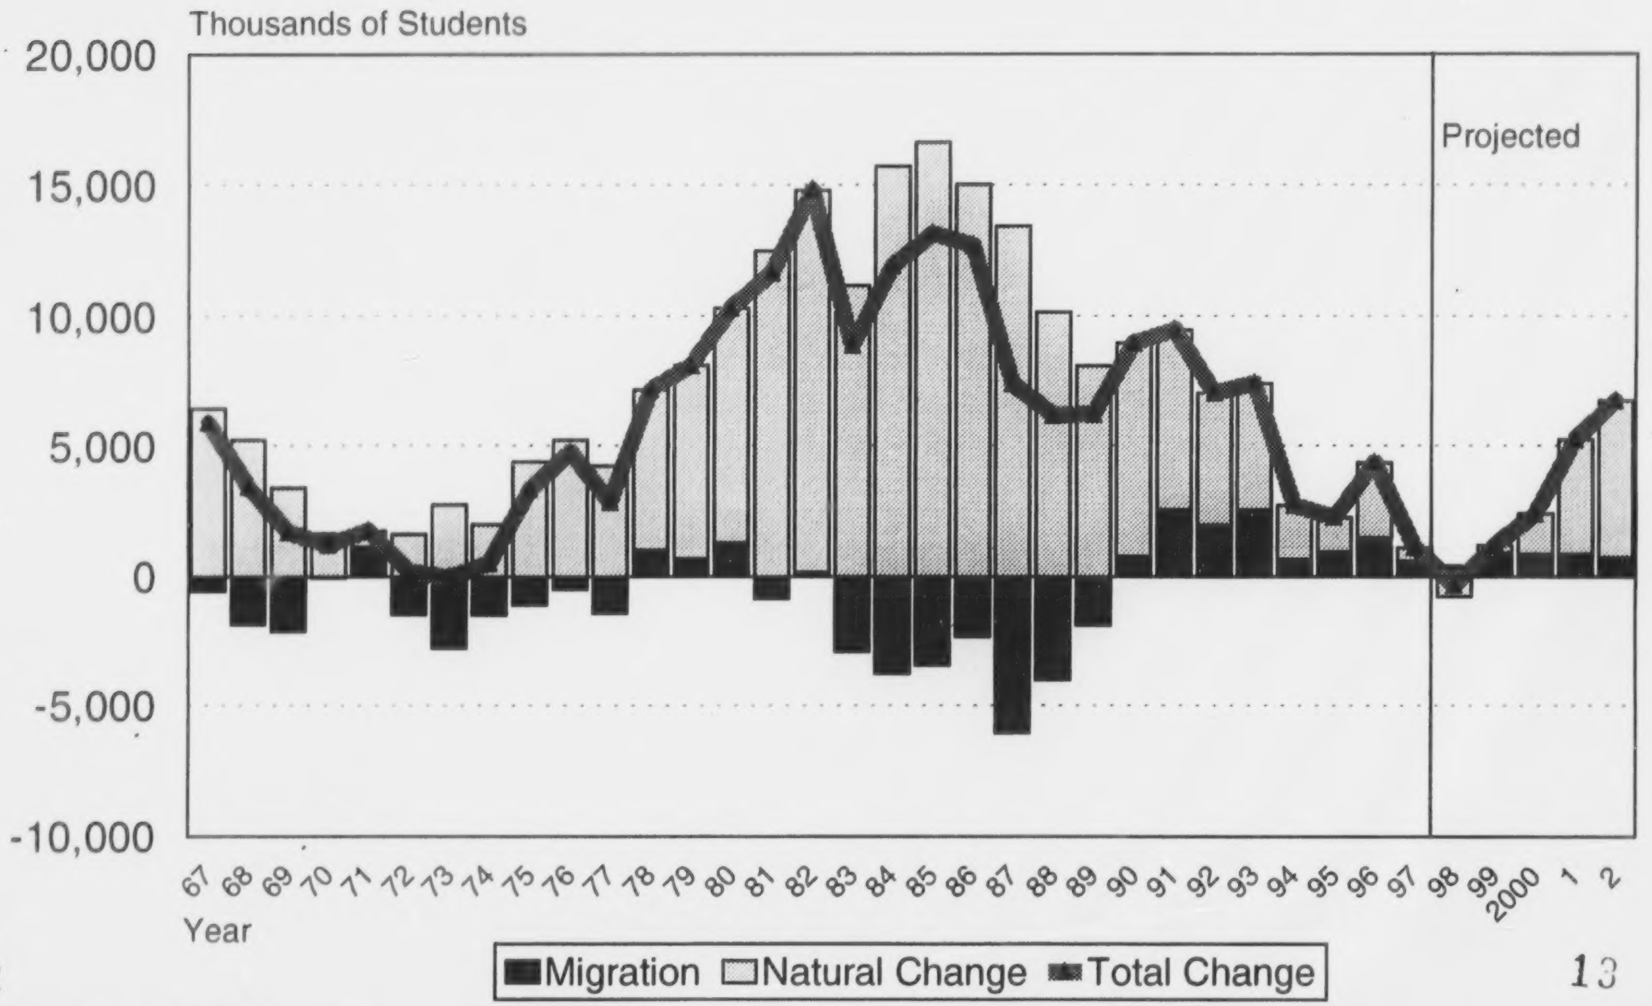
Neither set of definitions has in the past addressed the issue of persons who are multiracial. A person with multiracial heritage has had to choose the category that one most closely identifies with. This will change with the 2000 Census when people will be able to mark all the categories that apply. The U.S. Department of Education will follow suit to some degree by the year 2003.

Using 1995 U.S. Department of Education definitions and data, there are only six states that are less diverse racially/ethnically than Utah. About 89.0 percent of Utah's students are white. While other groups are experiencing strong growth in percentage terms, their total numbers are still relatively small. Hispanic is the most notable with over 31,000 students in 1997 and the fastest average annual growth rate of 7.5 percent of any group.

As is reflected by 1997 total enrollment percentages, most students by race/ethnic category also live in the four metropolitan counties of Weber, Davis, Salt Lake, and Utah: 83.1 percent of Hispanic, 89.5 percent of Asian, 94.5 percent of Pacific Islander, 91.8 percent of Black, and 74.1 percent of White. There is one exception: only 40.8 percent of American Indian students live in the metropolitan counties. By school district, the largest share (1,835 students) live in San Juan where Utah is home to part of the Navajo Reservation. San Juan is the only district where children of color are the majority. The next largest Reservation is Uintah-Ouray located in Uintah and Duchesne counties. As a percent of total enrollment, American Indian enrollment statewide has remained virtually unchanged at 1.5 percent between 1977 and 1997.

Note:
Fall Enrollment figures are audited for accuracy by independent auditors at the school and district levels, and by state and federal auditors, at those respective levels. The figures in this report appear as they were submitted by all districts, with two exceptions: The total count for Asian and Pacific Islander for 1990 in Salt Lake City in 1990 and for Provo in 1995 remains unchanged, but regression analysis was used to impute the disaggregated amounts for Asian and Pacific Islander.

1967-97 Components of Enrollment Change



Utah State Office of Education, Finance and Statistics.
Natural Change=Current year Kindergarten minus prior year 12th grade.
Migration=Current year total enrollment minus natural change minus prior year total enrollment.
Total Change=actual difference between current year total enrollment and prior year total enrollment.
